Make a Bird Feeder

Did you know birds are an important part of garden ecosystems? Bird feeders allowed you to see birds up close, help the birds feed their chicks and provides the birds energy for migrating.

Why not try making your own bird feeder with your kids?

Ideas on how to make your own bird feeder are:

- Melt lard and mix with seed
- Either use a pinecone, half of an orange skin or reuse an empty yogurt pot and fill
- Using string hang the bird feeder up in your garden for the birds to enjoy

By doing this you are helping birds to thrive in the area.

We want to see your
creations so email them to
